ABOUT THE WORKSHOP

India's research base has expanded in the last decade, as several new institutions were set up. The number of researchers went up, compared to what the country had at the end of the 20th century. Since 2004, India has increased its scientific output 3.8 times in the SCOPUS database and 3.4 times in the Web of Science, thus coming to sixth position in scientific output in the world. According to our Honorable Prime Minister Modi, "By 2030, India will be among the top three countries in science and technology." In order to achieve such great vision, research output has to increase substantially. This necessitates more organized information on what is research process in a nutshell, what are the literature sources available, how to write a quality technical paper, what are the citation styles to be used in a paper, how to manage references, how to avoid plagiarism and how to publish paper in peer-reviewed journals. This workshop on Research paper writing is primarily for Research Scholars/academicians in providing useful insights about writing good quality of research paper. The workshop has a special session on writing a quality Technical paper in IEEE. This session will offer valuable guidance on everything from how the IEEE publishing process works to basic writing tips and submitting a manuscript.

In addition to this, workshop will also give understanding and working knowledge of reference management tool Mendeley. It is a free reference management tool that can help you organize your research, collaborate with others online, and discover the latest research. This tool helps the
