COURSE (	COURSE OUTCOMES	
C430-3.1	Explain the various statistical methods to design a biological studies and data representation.	Understand Level (C2)
C430-3.2	Apply different statistical methods and approaches to study the significance of a study.	Apply level (C3)
C430-3.3	Examine the relationship between different parameters of a study.	Analyze level (C4)
C430-3.4	Choose appropriate statistical methods, tools and resources including prediction, validation and evaluation of the biological studies.	Evaluate level (C5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction	Application and use of Biostatistics as a science, scope.	1
2.	Study design in various fields of research	general principles of study design and its implications for valid inference	1
3.	Sampling theory	Sampling scheme, simple/ systematic/ stratified/ cluster	2

		sampling, Sources of data collection	
4.	Data presentation	Graphical, tabular, Mathematical, finding the central tendency, measure of variations	3
5.	Overview of different statistical methods used in the field of biological sciences.	Hypothesis testing, T-test, Chi square test, ANOVA, Sign Test, Wilcoxon Signed Rank Test, Wilcoxon Rank Sum Test, odds ratio, Binomial/normal/Poisson distribution of probabilities, determination of power of study and sample size calculation, regression analysis, correlation analysis,	13
6.	Analysis of data source	Assess data sources and data quality for the purpose of selecting appropriate data for specific research questions	3
7.	Selection of statistical methods	Identifying the appropriate statistical methods to be applied in a given research setting, applying the selected methods and analysis.	4
8.	Application of Biostatistical analysis.	Designing various studies of medical/ health/ Microbial/Agricultural/Genetics/Pharamaceutical science related studies.  Data analysis using different methods Result interpretation	7
9.	Case studies	Based on various research studies and systematic reviews.	4
10.	SPSS, Stats at the bench	Introduction to SPSS, Entering data in SPSS editor. Solving the compatibility issues with different types of files. SPSS and working with <b>descriptive statistics.</b>	4

C432-3.3	Analyze the emerging waste management technologies for sustainable solution	Analyze level (C4)
C432-3.4	Assess the environmental, social and economic aspects in integrated waste management	Evaluate level (C5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	An introduction to Waste management	Definition of waste, sources, general categories of waste in context of Indian legislations, waste generation aspects, waste collection, storage and transport	4
2.	Biological and chemical waste treatment technologies	Waste incineration and waste to energy (WTE), fundamentals of thermal processing – combustion, pyrolysis, gasification, energy recovery system, aerobic and anaerobic digestion, composting, biogasification and mechanical biological treatment of wastes.	7

3.	Waste handling and disposal	Health considerations in the context of operation of facilities, handling of materials and impact of outputs on the environment, Landfills: Design and operation including: site selection, Geo-environmental investigations, engineered sites, liners and covers, management of landfill leachate and the mining of old landfills, gas recovery and control, including utilization of recovered gas (energy), and landfill monitoring and reclamation, Natural attenuation process and its mechanisms, integrated waste management	7
4.	Source Reduction and waste Recycling	Unit operations for separation and processing, size reduction, separation, density separation.	8
5.	Product recovery and biorefinery	Recovery of Biological Conversion Products: Composts and Biogas, recovery technologies to deliver added-value products	5
6.	Hazardous Waste: Management and Treatment	Specific waste streams including healthcare (biomedical wastes), food wastes, mineral and mining wastes, electronic waste, hazardous wastes and producer responsibility wastes.	6
7.	Legal aspects and policy guidelines	Regulatory requirements for identification, characterization and disposal of hazardous, nonhazardous and domestic wastes, International treaties addressing waste issues	3
