

4.2. Cryptography and Network Security

Detailed Syllabus Lecture-wise Breakup

Course Code	17B2NCI743	Semester Even (specify Odd/Even)	Semester 8th Session 2018 -2019 Month from Jan 2019 – June 2019
Course Name	Cryptography and Network Security		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Dr. Sangeeta Mittal
	Teacher(s) (Alphabetically)	Dr. Sangeeta Mittal

COURSE OUTCOMES		COGNITIVE LEVELS
C433-1.1	Describe classical encryption methods based on Substitution and Permutation	Understand (Level 2)
C433-1.2	Implement and apply modern block and stream cipher techniques like DES, AES and RC4	Apply (Level 3)
C433-1.3	Analyse the role of prime number theory and quadratic congruence in cryptography	Analyse (Level 4)
C433-1.4	Implement and apply asymmetric encryption algorithms of RSA , ElGamal and Elliptic Curve Cryptography	Apply (Level 3)
C433-1.5	Criticize hashing algorithms like SHA-512 and SHA – 1024	Analyse (Level 4)
C433-1.6	Compare and Choose cryptographic techniques for using Digital Signatures and certificates in existing applications	Evaluate (Level 5)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Classical Encryption Techniques	Modular Arithmetic , Substitution Ciphers: Shift , Playfair, Vernam, Vignere, Affine, Hill, Rail fence, Transposition Ciphers	6
2.	Modern Block Ciphers	Fiestel and Non Fiestel Encryptions, Data Encryption Standard, polynomial modular arithmetic, fields, generators, Advanced Encryption Standard	8
3.	Modern Stream Ciphers	Linear Feedback Shift Registers and RC4	4
4.	Mathematics for Public Key Cryptography	Prime number theory, Euler's theorem, Fermat's theorem Chinese Remainder Theorem, quadratic congruence, discrete logarithm, fast exponentiation	6
5.	Public Key Cryptography	RSA, Knapsack, Rabin , ElGamal and Elliptic Curve Cryptography	10

6.	Hashing Algorithms	Requirements of Hashes for Cryptography, Message Digests,SHA-1	4
7.	Digital Signatures and Certificates	Elgamal Signatures, Digital Signature Standards, X.509 Certificates, Kerberos	4
Total number of Lectures			42

Evaluation Criteria

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25 (5 Quiz + 5 Assignment+ 5 Attendance+10 Project)
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	William Stallings, Cryptography and Network Security 5 th Edition, Prentice Hall 2011
2.	B A Forouzan and Debdeep Mukhopadhyay, Cryptography and Network Security, 3 rd Edition, Mc Graw Hill, 2015
3.	W Trappe, L.C. Washington, Introduction to Cryptography with Coding Theory 2 nd Edition, Pearson Education,2006
4.	Network security essentials: applications and standards by William Stallings.,5/e, Prentice Hall,2013
5.	ACM Transactions on Information and system security
6.	IEEE Press Computer Security and Privacy

4.3. Distributed Computing

Detailed Syllabus Lecture-wise Breakup

Subject Code	18B12CS419	Semester Even (Even)	Semester VIII Session 2018 - 19 Month from January to May
Subject Name	Distributed Computing		
Credits	3+1	Contact Hours	3 Lectures +1 Tutorial

Faculty (Names)	Coordinator(s)	Dr. Parmeet Kaur
	Teacher(s) (Alphabetically)	1. Dr. Parmeet Kaur 2. Dr. Prakash Kumar

COURSE OUTCOMES		COGNITIVE LEVELS
C433-2.1	Identify and solve event ordering related problems occurring due to various synchronization related issues in distributed systems (e.g., using Lamport, Vector, Matrix clock implementations).	Identify, Solve Level 3
C433-2.2	Compare and explain the solutions for mutual exclusion and deadlock related issues for various application specific scenarios that may occur in distributed environments (e.g., using token and non-token based techniques). [Level 2]	Compare Level 2
C433-2.3	Examine and distinguish data consistency and replication related issues for various distributed scenarios.	Examine and Distinguish Level 4
C433-2.4	Evaluate and assess fault tolerance related issues for perceiving reliable systems in distributed environments.	Evaluate Level 5
C433-2.5	Show how the concepts of distributed computing have been applied in existing distributed database systems, distributed file systems and cloud based systems.	Show Level 1

Module No.	Title of the Module	Topics in the module	No. of Lectures for the module
1.	Review of principles, concepts foundation to Distributed Systems.	Review of Operating Systems principles, Introduction to Distributed Systems.	2
2.	Consistency and Replication Issues	Data-centric consistencies, Client-centric consistencies. Epidemic Protocols and Implementation Issues.	6
3.	Fault Tolerance and Reliability	Fault Tolerance, Reliability in Distributed Systems, group communications, and Distributed commit. Two Phase commit and Three Phase commit. Failure Recovery.	7

4.	Synchronization mechanisms	Resource models. Clock synchronization, Inherent limitations of distributed operating systems. Event ordering. Timestamps. Global state collection mechanisms. Termination Detection, Bully Algorithm. Ring Algorithm.	6
5.	Mutual Exclusion and Deadlock handling	Process deadlocks in DS. Distributed mutual exclusion. Token and non-token based algorithms. Comparative performance analysis.	9
6.	Agreement Protocols	System Model, Classification, Byzantine Problems and solutions.	4
7.	Distributed Computing Vs Cloud Computing.	Introduction, Challenges, Cloud Computing architectures, Virtualization in Cloud Computing, Building applications and Infrastructures in the cloud, Security Issues.	2
8.	Self Stabilizing Systems	System model, Self-Stabilization design issues and methodologies, Theoretical Foundations, Stabilizing DMEs, Stabilizing protocols, and Stabilizing Synchronization, Limitations etc.	4
9.	Case Studies	Distributed File Systems and Distributed Databases	2
			42

Evaluation Criteria

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25 (Programming assignment:10, Assignments:10, Attendance:5)
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	Tanenbaum, A.S, Marten, V. Steen, Distributed Systems : Principles and Paradigms, 2 nd Edition, Prentice Hall .
2	M. Singhal, N. G. Shivaratri, Advanced Concepts in Operating Systems, 1 st Ed., Tata McGraw-Hill, 1994.
3.	“Introduction to Cloud Computing Architecture” Sun’s White Paper, 1 st Edition, June, 2009.
4.	Tanenbaum, A. S Distributed Operating Systems, 1 st Ed., Prentice-Hall, Englewood Cliffs, NJ, 1995.
5.	Sukumar Ghosh “Distributed Systems An Algorithmic Approach”. Chapman and Hall/ CRC, Taylor and Francis Group.
6.	IEEE, ACM Transactions, Journals and Conference papers on “Distributed and Cloud Computing.”
7.	George Reese, “Cloud Application Architectures: Building Applications and Infrastructure in the Cloud” O’REILLY publication.
8.	“Virtualization Overview”, White paper, VM Ware.
9.	“Implementing Virtualization” White paper, Intel virtualization Technology, 2008
10.	Tulloch, Mitch, Understanding Microsoft virtualization solutions: From the Desktop to Data Center, Microsoft Press.

4.4. HIGH PERFORMANCE WEB & MOBILE APPLICATIONS

Detailed Syllabus Lab-wise Breakup

Course Code	17B1NCI735	Semester Even (Even)	Semester VIII Session 2018 -2019 Month from Jan to July
Course Name	HIGH PERFORMANCE WEB & MOBILE APPLICATIONS		
Credits	3	Contact Hours	4

Faculty (Names)	Coordinator(s)	Prashant Kaushik
	Teacher(s) (Alphabetically)	Prashant Kaushik

COURSE OUTCOMES		COGNITIVE LEVELS
C433-3.1	Analyze differentiating aspects of high performance and regular web applications.	Analyze Level (Level 4)
C433-3.2	Explain the design goals of high performance web & mobile applications.	Understand Level (Level 2)
C433-3.3	Design and develop Server and mobile applications for Multi threaded environment	Create Level (Level 6)
C433-3.4	Build the performance metrics for evaluating the application load.	Evaluate Level (Level 6)
C433-3.5	Make use application testing suite for performance testing	Apply Level (Level 3)
C433-3.6	Analyze the crash reports for various types of crashes due to multiple platforms of mobile devices in a consolidated manner.	Apply Level (Level 4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Intro to HPC	Introduction to HPC systems and web and its mobile variants	01
2.	MQTT	MQTT, other high performance protocols	04
3.	MQTT programming	Programming of MQTT protocols	04
4.	MQTT Testing	Testing the MQTT with loading	04
5.	DB replication	Replication of web servers and databases	04
6.	HPC comparision	Comparisons of web servers with new and old	06
7.	Replication Testing	Testing the replication system with various metrics and load	06
8.	Load generator	Mobile app simulator for load of mobile devices	06
9.	MQTT Server	Server with mqtt and high performance outputs	04
10.	Hackathon	Live Hackathon for creating High performance protocols	03
Total number of Lectures			42
Evaluation Criteria			

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Hands-On Mqtt Programming with Python By Gaston C Hillar
2.	MQTT A Concise and Practical Tutorial By Gerard Blokdyk

4.5. Geoinformatics

Detailed Syllabus Lecture-wise Breakup

Course Code	19B12CS411	Semester Even (specify Odd/Even)	Semester VIII Session 2018 -2019 Month from January to May
Course Name	Geoinformatics		
Credits	3	Contact Hours	3L+1T

Faculty (Names)	Coordinator(s)	Ankita
	Teacher(s) (Alphabetically)	Ankita

COURSE OUTCOMES		COGNITIVE LEVELS
C433-4.1	Illustrate Geoinformatics concepts , branches, techniques and real world applications.	Understanding Level (C2)
C433-4.2	Apply appropriate vector and raster data structures like k-d tree, quad tree, geotree etc to different applications.	Apply Level (C3)
C433-4.3	Sketch maps using the basics of data capture, storage, analysis, and output in QGIS tool.	Apply Level (C3)
C433-4.4	Apply various spatial statistical methods like Local indicators of spatial association for point pattern analysis in numerous Geoinformatics applications.	Apply Level (C3)
C433-4.5	Compare and contrast different spatial data mining techniques to select the appropriate one for discovering useful information from spatial data belonging to different domains.	Analyze Level (C4)
C433-4.6	Implement different algorithms for detection of hotspots of different shapes in spatial and spatio-temporal data.	Apply Level (C3)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction to Geoinformatics	Definition, branches, case studies. GIS components, map scales, georeferencing, projections, and time zones.	03
2.	Spatial data models	Vector and Raster data models. Spatial data Acquisition: topographical & thematic mapping, Geocoding. Non spatial attributes	04
3.	Data Structures for spatial data	k-d tree, Quadtree: region quadtree, point quadtree, point region quadtree, Geo-tree. Insertion, deletion and k nearest neighbor queries.	08
4.	Spatial data mining	Basic concepts, spatial databases. Preprocessing spatial data: data cleaning, conversions of georeferencing systems, spatial interpolation using Voronoi diagrams.	04
5.	Families of SDM patterns	Spatial collocation and association patterns, spatial clustering for large data, decision trees for spatial analysis, outlier detection. Applications and case studies in criminology, epidemiology, earth sciences.	08
6.	Point pattern analysis	Spatial processes, Spatial statistical methods for point pattern analysis: LISA, kernel density functions, heat maps.	05

7.	Spatial and Spatio temporal hotspot detection	Scan statistics based techniques for spatial and spatio temporal detection of various shapes hotspots.	06
8.	QGIS tool	Layering, vector, raster and spatialite files, attribute tables, styling, labeling etc. Basic map making operations. Analysis using Voronoi diagram and buffering.	04
Total number of Lectures			42

Evaluation Criteria

Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25 (mini project, class performance, attendance)
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

1.	Francis Harvey, A Primer of GIS, Fundamental Geographic and Cartographic Concepts, <i>Second Edition</i> , THE GUILFORD PRESS, London, 2008.
2.	Paul, J.C. Geographical Information Systems and computer Cartography, Longman, 2005.
3.	Karen K. Kemp, Encyclopedia of geographic information, SAGE Publications, 2008.
4.	A. Stewart Fotheringham and Peter A. Rogerson, The SAGE handbook of spatial analysis, SAGE publications, 2009.
5.	Shellito, Bradley, Introduction to geospatial technologies, fourth edition, Freeman publications, 2018.
6.	https://mgimond.github.io/Spatial/introGIS.html
7.	https://www.qgis.org/en/docs/index.html

4.6. Bitcoin and Cryptocurrency Technologies

Detailed Syllabus Lecture-wise Breakup

Course Code	19B12CS413	Semester (Even)	Semester VIII Session 2018 -2019 Month from January-June
Course Name	Bitcoin and Cryptocurrency Technologies		
Credits	03	Contact Hours	(L+T) (3+1)

Faculty (Names)	Coordinator(s)	Dr. P. Raghu Vamsi
	Teacher(s) (Alphabetically)	Dr. P. Raghu Vamsi

COURSE OUTCOMES		COGNITIVE LEVELS
C434-1.1	Understand cryptographic primitives used for cryptocurrency.	Remember Level (Level 1)
C434-1.2	Understand and describe implementation of crypto currency using Blockchain.	Understand Level (Level 2)
C434-1.3	Identify and analyse the real world problems that the cryptocurrency is trying to solve.	Apply Level (Level 3)
C434-1.4	Examine and implement tools and techniques to build a cryptocurrency and blockchain application.	Analyze Level (Level 4)
C434-1.5	Explore the platforms such as Bitcoin, Ethereum, and Hyperledger to create and evaluate the cryptocurrency implementation.	Evaluate Level (Level 5)
C434-1.6	Build, compose and test the concepts, policies and strategies of specified crypto currency implementation.	Create Level (Level 6)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction	Introduction to Cryptography and Cryptocurrencies – Introduction to cryptographic hash functions; Hash pointers and data structures; Digital signatures; Public keys as identities; A simple cryptocurrency.	3
2.	Bitcoin	How Bitcoin achieves decentralization; Distributed consensus; Consensus without identity using Blockchain; Incentives and Proof of Work (PoW); Attacks on PoW; Advantages and Limitations of PoW; Bitcoin – NG.	3
3.	Mechanics of Bitcoin	Bitcoin transactions; Bitcoin scripts; Applications of Bitcoin scripts; Bitcoin blocks; Bitcoin network; Limitations and improvements	3
4.	Storing and Using Bitcoins	Simple local storage; Hot and cold storage; Splitting and Sharing Keys; Online wallets and exchanges; Payment services; Transaction Fee; Currency Exchange Markets	3
5.	Bitcoin as platform	Bitcoin as append only log; Bitcoin as smart property; Secure Multi party lotteries in Bitcoin; Bitcoin as public randomness source; Predication markets and real world data feeds	3
6.	Bitcoin Mining	Task of Bitcoin miners; Mining Hardware; Energy consumption and Ecology; Mining pools; Mining Incentives and strategies.	3

7.	Bitcoin and Anonymity	Anonymity basics; De-Anonymizing Bitcoin; Mixing – Decentralized Mixing; Zero coin and Zero hash	3
8.	Community, Politics, and Regulations	Consensus in Bitcoin; Bitcoin software; Stakeholders; Roots of Bitcoin; Governments and Bitcoin; Anti-money laundering; Regulation; New York's Bitcoin License proposal	3
9.	Alternative mining puzzles	Essential puzzle requirements; ASIC- resistant puzzles; Proof of Useful Work; Non-out-sourceable puzzles; Proof of Stake and virtual mining.	3
10.	Decentralized institutions	Future of Bitcoin; Blockchain as vehicle for decentralization; Routes to blockchain integration; Templates for decentralization; Decentralization implementation requirements.	3
11.	Creating a Cryptocurrency	Solidity basics; Meta mask framework; Remix IDE; Ethereum and Truffle IDE; A working example.	8
12.	Altcoins and the Cryptocurrency eco system	Altcoins history and motivation; Few Altcoins in detail; Relation between Bitcoin and Altcoin; Merge mining; Atomic cross chain swaps; Bitcoin backed Altcoins; Ethereum and Smart contracts	4
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25	
Total		100	

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller, Steven Goldfeder. Bitcoin and Cryptocurrency Technologies: A Comprehensive Introduction, Princeton University Press, 2016.
2.	Antonopoulos, Andreas M. "Mastering Bitcoin: unlocking digital cryptocurrencies", O'Reilly Media, Inc., 2014.

4.7. Search-Based Software Engineering (SBSE)

Detailed Syllabus Lecture-wise Breakup

Course Code	18B12CS415	Semester EVEN (specify Odd/Even)	Semester VIII Session 2018 -2019 Month from January 2019 – June 2019
Course Name	Search-Based Software Engineering (SBSE)		
Credits	3-1-0	Contact Hours	4

Faculty (Names)	Coordinator(s)	Dr. Amarjeet Prajapati
	Teacher(s) (Alphabetically)	...

COURSE OUTCOMES		COGNITIVE LEVELS
C434-2.1	Define the various types of optimization problems in context of software engineering.	Remember Level (Level 1)
C434-2.2	Explain and demonstrate various software engineering activities/tasks as search-based optimization problem.	Understand Level (Level 2)
C434-2.3	Design and develop methods for finding optimal solutions using search-based meta-heuristic techniques.	Create Level (Level 6)
C434-2.4	Apply and Implement different optimization techniques on various forms of software optimization problems.	Apply Level (Level 3)
C434-2.5	Analyze the behavior of different optimization techniques corresponding to different forms of software optimization problems.	Analyze Level (Level 4)
C434-2.6	Evaluate the performance of different single and multi-objective optimization techniques using different quality indicators.	Evaluate Level (Level 5)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures for the module
1.	Introduction	Search-based Software Engineering (SBSE), why SBSE, architecture of SBSE, commonly used search techniques, Optimization Problems, Metaheuristic Algorithms, software engineering problem as a search-based optimization problem	6
2.	Optimization	Various types of optimization problems (e.g., linear and non-linear, convex and non-convex, single and multi-objective, etc.) in the context of software engineering	6
3	Problem Formulation	Define and formulate various software engineering activities/tasks e.g., requirement analysis, software design and software restructuring as search-based optimization problem	4
4.	Meta-heuristics	Tailoring various optimization methods and algorithms such as Harmony Search (HS), Artificial Bee Colony (ABC), Particle Swarm Optimization (PSO), etc., according	6

		to their suitability with respect to various classes of software engineering problems	
5.	Application to software engineering problem	Apply and Implement different optimization techniques on various forms of software optimization problems e.g., software architecture recovery, software refactoring, and software remodularization	6
6.	Statistical Analysis	Statistical hypothesis testing, parametric and nonparametric statistical tests	6
7.	Evaluation	Evaluate the performance of different single and multi-objective optimization techniques using different quality indicators such as Generational Distance (GD), Inverted Generational Distance (IGD), hyper-volume (HV), Error Ratio, Set Coverage Metric, Spacing and Spread	8
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25 (To be mapped from Class Test 1,2,3)	
Total		100	

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Nature-Inspired Optimization Algorithms, by Xin-She Yang Publisher: Elsevier <i>Release Date: February 2014</i> , ISBN: 9780124167438
2.	Practical Optimization, Book by Philip E. Gill
3.	Practical Methods of Optimization, Book by R. Fletcher
4.	Object-Oriented Modeling and Design with UML (2nd Edition) Michael R. Blaha; James R Rumbaugh
5.	Head First Object-Oriented Analysis and Design A Brain Friendly Guide to OOA&D By Brett McLaughlin, Gary Pollice, David West
6.	OBJECT-ORIENTED ANALYSIS AND DESIGN With applications Third EDITION Grady Booch Rational Santa Clara, California

4.8. Introduction to Deep Learning

Course Description

Detailed Syllabus

Course Code	18B12CS428	Semester : EVEN ...	Semester : VIII ... Session 2018 - 2019 Month: from Jan- May, 2019
Course Name	Introduction to Deep Learning		
Credits	04	Contact Hours	04

Faculty (Names)	Coordinator(s)	Satish Chandra
	Teacher(s) (Alphabetically)	Himanshu Mittal Satish Chandra

Sr. No.	Description	Cognitive Level (Bloom's Taxonomy)
C434-3.1	Identify and express the motivation behind and need of Deep Learning .	Understanding (Level-2)
C434-3.2	Comprehend the basic theory of learning, probability in learning, error minimization and regularization techniques.	Understanding (Level-2)
C434-3.3	Design and Model Convolution Neural Networks for Image recognition and Computer Vision.	Apply (Level-3)
C434-3.4	Apply Recurrent Neural Networks and LSTM for temporal data	Apply (Level-3)
C434-3.5	Assess the Deep Learning techniques on the basis of performance measures such as training speed, classification error, kappa coefficient, precision, recall and F-Measure.	Evaluate (Level-5)

Lecture Plan:

Sr. No.	Module	Topic	No. of Lectures
1.	Introduction	Course overview: What is deep learning? DL successes; DL versus Shallow Networks	02
2.	Mathematics for Machine Learning	Math review : Gradient descent, logistic regression. Probability, continuous and discrete distributions; maximum likelihood. PAC.	04
3.	Neural Network Fundamentals	Neural networks : cost functions, hypotheses and tasks; training data; maximum likelihood based cost, cross entropy, MSE cost; feed-forward networks; MLP, sigmoid units. Backpropagation by Gradient Descent Optimization	04
5.	Deep Neural Network-1	Deep learning strategies: GPU training, regularization, RELU, dropouts etc.	04
6.	Deep Neural Network-2	Convolutional neural networks: HPC in Deep Learning	06
7.	Deep Neural Network-3	CNN Architectures LeNet, AlexNet, VGG Net, GooleNet: a comparative analysis	06
8.	RNN-1	Recurrent neural networks : architecture, application and performance evaluation	06

8.	RNN-2	LSTM and gated networks: architecture, application and performance evaluation	06
9.	Unsupervised Deep learning	Unsupervised deep learning (autoencoders)	04

Evaluation Criteria	
Components	Maximum Marks
T1	20
T2	20
End Semester Examination	35
TA	25
Total	100

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Nikhil Buduma, Fundamentals of Deep Learning, Shroff Publishers , 2018
2.	Ian Goodfellow, Yoshua Bengio and Aaron Courville, Deep Learning, MIT Press , 2017

4.9. Autonomous Decision Making

Detailed Syllabus Lecture-wise Breakup

Subject Code	18B12CS412	Semester: Even (specify Odd/Even)	Semester VIII Session 2018-2019 Month from Jan19 to June19
Course Name	Autonomous Decision Making		
Credits	4	Contact Hours	3-1-0

Faculty (Names)	Coordinator(s)	Dr. Shikha Jain
	Teacher(s) (Alphabetically)	Dr. Shikha Jain

COURSE OUTCOMES		COGNITIVE LEVEL
C434-4.1	Comprehend and represent the type of agents and environment	Understanding (Level 2)
C434-4.2	Apply various search techniques in partially-observable and dynamic environment and optimizing path.	Applying (Level 3)
C434-4.3	Develop exact and approximate reasoning models for uncertain input and uncertain environment.	Applying (Level 3)
C434-4.4	Construct temporal, utility-based, temporal-utility-based and multi-agents based models for reasoning in uncertain environment.	Applying (Level 3)
C434-4.5	Examine and analyse the application of various techniques in different scenario of uncertain environment.	Analyzing (Level 4)
C434-4.6	Evaluate and compare the performance of different techniques on the basis of complexity.	Evaluating (Level 5)

Module No.	Title of the Module	Topics in the module	No. of Lectures for the module
1.	Introduction	Formulating problem solving as state-space search, Analysis of uninformed search (BFS and DFS)	2
2.	Exploring Roadmaps and Paths	Exploring Roadmaps: configuration space, combinatorial Planning (visibility graph, voronoi diagram, exact cell, approximate cell, fixed cell), Sampling based planning (probabilistic roadmap, rapidly exploring random tree); Exploring paths: informed search	6
3.	Search in Dynamic Environments	Agent centered search (Learning Real-Time A*, Real-Time Adaptive A*), Anytime search (repeated weighted A*, Anytime Repairing A*), Incremental Search (Lifelong Planning A*), Anytime and incremental search (Anytime D*), Path optimization	7
4.	Reasoning in an Uncertain World	Bayes rule, Bayesian Network, Markov Blanket, Utility Theory	2
5.	Probabilistic Reasoning	Probabilistic Reasoning using uncertain evidence, unreliable evidence; Exact	7

		inference in uncertain environment using BN by enumeration and variable elimination; Approximate Inference in uncertain environment using BN by direct sampling, rejection sampling, Likelihood weighting and Markov Chain Monte Carlo algorithm	
6.	Simple decision making	Simple decision making considering belief and desire in uncertain environment, utility based agent, decision network.	2
7.	Inference in temporal Model	Markov Model; Reasoning over time using Hidden Markov Model (HMM); Exact and approximate inferencing using Dynamic Bayesian network;	5
8.	Complex decision making	Complex decision making for a temporal utility based agent in uncertain environment using MDP and POMDP	5
9.	Multi-agent and Reinforcement Learning	Decision making multi-agent environment in game theory, Nash equilibrium; Reinforcement Learning	4
10.	Handling uncertain input	Handling uncertain input using fuzzy systems.	2
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks	
T1		20	
T2		20	
End Semester Examination		35	
TA		25	
Total		100	

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	Russell, Stuart J., and Peter Norvig. Artificial intelligence: a modern approach. Malaysia; Pearson Education Limited,, 2016

4.	Shi, Zhongzhi. Advanced artificial intelligence. Vol. 1. World Scientific, 2011.
5.	Maxim Likhachev, Dave Ferguson, Geoff Gordon, Anthony Stentz, and Sebastian Thrun, "Anytime search in dynamic graphs", September 2008.

4.11. Project Part – 2 (IT)

Detailed Syllabus Lab-wise Breakup

Course Code	15B29CI891	Semester Even (specify Odd/Even)	Semester VIII Session 2018 -2019 Month from Jan to June 2019
Course Name	Project Part – II (IT)		
Credits	12	Contact Hours	...

Faculty (Names)	Coordinator(s)	Dr. Manish Kumar Thakur
	Teacher(s) (Alphabetically)	Entire Department

COURSE OUTCOMES		COGNITIVE LEVELS
C451.1	Summarize the contemporary scholarly literature, activities, and explored tools for hands-on in the respective project area	Understand Level (Level 2)
C451.2	List out the specific requirements to develop the workable solution for the identified computing problem.	Analyze Level (Level 4)
C451.3	Develop a workable computing solutions for the identified problem	Create Level (Level 3)
C451.4	Evaluate the performance of the developed solution	Evaluate Level (Level 5)
C451.5	Compile the results and findings of the project in written and verbal formats	Create Level (Level 6)

Module No.	Title of the Module	List of Experiments	CO

	Teacher(s) (Alphabetically)	Navneet Kumar Sharma and Anshu Varshney

COURSE OUTCOMES		COGNITIVE LEVELS
C402-3.1	Recall the fundamental properties of light and the processes involved in the generation of light	Remembering (C1)
C402-3.2	Interpret the theory of fiber optics	Understanding (C2)
C402-3.3	Apply the fundamentals of various nonlinear optical effects in technology; make use of holography and its applications	Applying (C3)
C402-3.4	Compare the operational principles, characteristics and trade-offs of optical detectors and modulators of light	Analyzing (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Lasers	Review of different types of laser systems. LEDs, Semiconductor lasers, Quantum well lasers, Q-switching and Mode locking in lasers.	8
2.	Fiber Optics	Numerical aperture, Step and graded index multimode fibers, attenuation and dispersion, modes in optical fibers. Single mode fiber, mode cutoff and mode field diameter. Connector and splice losses, Erbium doped fiber amplifier and Characterization techniques including OTDR.	10
3.	Photo detectors	Semiconductor photo detectors.	5
4.	Optical Electronics	Wave propagation in anisotropic media, Electro-optic effect: phase and amplitude modulation. Acousto-optic effect: modulators, deflectors and tunable filters, Magneto-optic effect: modulators.	4
5.	Optical devices	Electro-optical device, Acousto-optical device, Magneto-optical device, Optical Communication.	2
6.	Nonlinear Optics	SHG, Sum and Difference frequency generation, parametric amplification, wavelength converters, Self focusing with lasers.	6
7.	Holography	Recording and Reproduction of Hologram, Applications of holography.	4
8.	Applications of Photons in Memory devices	CD, VCD, DVD.	1

Total number of Lectures		40
Evaluation Criteria		
Components	Maximum Marks	
T1	20	
T2	20	
End Semester Examination	35	
TA	25 [2 Quiz (10 M), Attendance (10 M) and Cass performance (5 M)]	
Total	100	

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	R. P. Khare, <i>Fiber Optics and Optoelectronics</i> , Oxford University Press.
2.	A. K. Ghatak and K. Thyagarajan, <i>Optical Electronics</i> , Cambridge university Press.
3.	A. K. Ghatak and K. Thyagarajan, <i>An Introduction to Fiber Optics</i> , Cambridge university Press.
4.	B. B. Laud, <i>Lasers and Nonlinear Optics</i> , New Age International.

Detailed Syllabus
Lecture-wise Breakup

Course Code	18B12PH812	Semester: Even	Semester: VIII Session : 2018 -2019 Month from: January to June
Course Name	Astrophysics		
Credits	3	Contact Hours	3

Faculty (Names)	Coordinator(s)	Prof.Anirban Pathak and Dr. Sandeep Chhoker
	Teacher(s) (Alphabetically)	Anirban Pathak and Sandeep Chokker

COURSE OUTCOMES		COGNITIVE LEVELS
C402-4.1	Relate historical development of astrophysics with the modern concepts and recall the mathematical techniques used & definition of different units	Remembering (C1)
C402-4.2	Explain the models of universe, ideas of stellar astrophysics, life cycles of stars, physical principles that rules galaxies, and general theory of relativity	Understanding (C2)
C402-4.3	Apply mathematical principles and laws of physics to solve problems related to astrophysical systems	Applying (C3)
C402-4.4	Compare different models of universe and decide which one is logically acceptable and why	Analyzing (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1	Introduction to Astrophysics	Historical development of astrophysics (from mythology to contemporary astrophysics), Mass, length and time scales in astrophysics, sources of astronomical information (effect of discovery of spectroscopes and photography), astronomy in different bands of electromagnetic radiation (e.g. Optical astronomy, infra-red astronomy radio astronomy, X-ray astronomy. Gamma-ray astronomy etc. with specific mention of Hubble space telescope). Kirchoff's law, Doppler effect and Hubble's law.	8
2.	Stellar Astrophysics	Classification and nomenclature of stars. Basic equations of stellar structure, main sequence, red giants and white dwarfs, HR diagram, stellar evolution, supernovae, extra solar planets.	8
3.	Death of a star	End states of stellar collapse: degeneracy pressure of a Fermi gas, structure of white dwarfs, Chandrasekhar mass limit, neutron stars pulsars and black holes.	6
4.	Our galaxy	The shape and size of Milky way and its interstellar mater	2
5.	Extragalactic astrophysics	Normal galaxies, active galaxies, cluster of galaxies, large-scale distribution of galaxies.	6

6.	GTR and Models of Universe	Qualitative idea of general theory of relativity (without using tensor calculus) and its implications. Different models of universe. Specific attention to the ideas related to big bang, cosmological constants, dark matter and dark energy.	6
7.	Astrobiology	Drake equation and related questions.	2
8.	Conclusion	Review of the present status of Astrophysics and open questions.	2
Total number of Lectures			40

Course Code	16B1NMA831	Semester Even (specify Odd/Even)	Semester VIII	Session 2018-2019
Course Name	Optimization Techniques			
Credits	3	Contact Hours	3-0-0	
Faculty (Names)	Coordinator(s)	Prof. A. K. Aggarwal		
	Teacher(s) (Alphabetically)	Prof. A. K. Aggarwal		
COURSE OUTCOMES				COGNITIVE LEVELS
After pursuing the above mentioned course, the students will be able to:				
C402-2.1	apply generalized, revised and dual simplex method for linear programming problems (LPP).			Applying Level (C3)
C402-2.2	apply graphical, algebraic and linear programming techniques for pure and mixed strategy problems in game theory.			Applying Level (C3)
C402-2.3	classify and solve the problems on queuing and inventory models.			Analyzing Level (C4)
C402-2.4	solve and analyze the network scheduling and sequencing problems.			Analyzing Level (C4)
C402-2.5	make use of dynamic programming technique to solve complex linear programming problems.			Applying Level (C3)
C402-2.6	determine numerical solution of nonlinear multidimensional problems.			Evaluating Level (C5)
Module No.	Title of the Module	Topics in the Module		No. of Lectures for the module
1.	Review of Linear Programming	Convex sets, Linear Programming Problems (LPP), graphical and simplex method, Big-M method, Two phase method, generalized simplex method, revised simplex method, Duality theory, dual simplex method.		08
2.	Game Theory	Rectangular Games, Minmax Theorem, Graphical Solution of $2 \times n$, $3 \times n$, $m \times 2$, $m \times 3$ and $m \times n$ Games, Reduction to Linear Programming Problems.		06
3.	Queuing Theory & Inventory Model:	Introduction, Steady-State Solutions of Markovian Queuing Models: M/M/1, M/M/1 with limited waiting space, M/M/C, M/M/C with limited space, M/G/1, Inventory Models.		06
4.	Sequencing & Scheduling	Processing of Jobs through Machines, CPM and PERT.		06
5.	Dynamic Programming	Discrete and Continuous Dynamic Programming, Simple Illustrations.		06
6.	Nonlinear Programming	Unimodal function, One Dimensional minimization problem, Newton's Method Golden Section, Fibonacci Search, Bisection, Steepest Descent Method, Multidimensional Newton's method.		08
		Total number of Lectures		40

1.	Taha H. A., Operations Research: An Introduction, 7th edition, PHI, 2002.
2.	Rao, S. S. - Engineering Optimization, Theory and Practice, Third Edition, New Age International Publishers, 2010.
3.	Wagner, H. M., Principles of Operations Research with Applications to Managerial Decisions, Prentice Hall of India Pvt. Ltd., 1975.
4.	Hillier F. and Lieberman G. J., Introduction to Operations Research, 6th edition, McGraw-Hill, 1995.

Detailed Syllabus
Lecture-wise Breakup

Course Code	18B12BT415	Semester Even (specify Odd/Even)	Semester VIII Session 2018 -2019 Month from January-June
Course Name	Intellectual Property Rights and Bioethics		
Credits	3	Contact Hours	3

Faculty (Names)	Coordinator(s)	1. Prof. S Krishna Sundari
	Teacher(s) (Alphabetically)	1. Prof. S Krishna Sundari

COURSE OUTCOMES		COGNITIVE LEVELS
C402-14.1	Recall National and International IP rules and Agreements	Remember Level(C1)
C402-14.2	Summarize various aspects of Intellectual Property Rights in context with technological advancements	Understand Level(C2)
C402-14.3	Utilize different patent search engines and search patent literature in speciality domains	Apply Level(C3)
C402-14.4	Identify appropriate guidelines related to engineering, professional, and biotechnology research ethics	Apply Level(C3)
C402-14.5	Survey and classify patents, make a report and present the IPR status in different fields.	Analyze Level(C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Intellectual Property Rights	Different forms of Intellectual Property Rights - their Relevance, Importance to Industry, Academia, Role of IPRs in biotechnology, Patent Terminology: Patents, Trademarks, Copyrights, Industrial Designs, Geographical Indications, Trade secrets, non-disclosure agreements, Patent Life and Geographical Boundaries	4
2.	International organizations & IPR	Overview of WTO, TRIPS, WIPO, GATT, International conventions, Trade agreements, Implication of TRIPS for developing countries	3
3.	Process involved in Patenting, Patent Search	Procedural steps in patenting, Process of filing, PCT application, pre-grant & post-grant opposition, PCT and Patent harmonization including Sui-generis system, Patent Search methods, Patent Databases & Libraries, online tools, Country-wise patent searches (USPTO, EPO, India etc.), patent mapping	4
4.	IPR in Agriculture Technology &	Basic features of Indian Plant Varieties Protection & Farmer's Rights Act, UPOV, Invention/ Discovery,	4

	Biotechnology	Patentable subject matter, Generics, Compulsory Licensing, Exclusive Marketing Rights (EMR), Bolar provision, Bayh-Dole act, Second medical use	
5.	Traditional Knowledge and Intellectual Property Rights	The importance of Traditional Knowledge (TK) for developing nations, protecting TK, The local, national and global dimensions of the issues in TK and IPRs, Traditional Medicine & IP Protection, Folklore, Patenting of Health Foods: Case studies	3
6.	Introduction to Bioethics	Need of bioethics, applications and issues related to Bioethics, Social and cultural issues	2
7.	Bioethics & Biodiversity	Conserving natural Biodiversity, convention on protecting Biodiversity, Protocols in exchanging Biological material across borders	2
8.	Bioethics & GMO's	Issues and concerns pertaining to Genetically modified foods & food crops, Organisms and their possible health implications and mixing up with the gene-pool	3
9.	Bioethics in Medicine	Protocols of ethical concerns related to prenatal diagnosis, gene therapy, Organ transplantation, Xenotransplantation, ethics in patient care, Informed consent	7
10.	Bioethics & Cloning	Permissions and Procedures in Animal Cloning, Human cloning, Risks and hopes	3
11.	Bioethics in Research	Stem cell research, Human Genome Project, Use of animals in research, human volunteers for Clinical research, Studies on Ethnic races	5
12.	Ethics in Profession	Ethics related to professional streams , engineering	2
Total number of Lectures			42
Evaluation Criteria			
Components		Maximum Marks

Recommended Reading material: Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)	
1.	“Bioethics & Biosafety” by Sateesh MK, IK International publications, 2008
2.	USPTO Web Patent Databases at: www.uspto.gov/patft
3.	Government of India's Patents Website: patinfo.nic.in
4.	Intellectual property India: www.ipindia.nic.in
5.	“Indian Patent Law : Legal and Business Implications” by AjitParulekar, Sarita D'Souza Macmillan India publication, 2006
6.	“Agriculture and Intellectual Property Rights”, edited by: Santaniello, V., Evenson, R.E., Zilberman, D. and Carlson, G.A. University Press publication, 2003
7.	Research papers and Reports provided from time to time

Detailed Syllabus
Lecture-wise Breakup

Course Code	19B12HS814	Semester (specify Odd/Even): Even	Semester: 8th Session: 2018 -2019 Month from: January 18 –June18
Course Name	Digital Transformation in Financial Services		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Dr.Sakshi Varshney
	Teacher(s) (Alphabetically)	Dr.Sakshi Varshney

COURSE OUTCOMES		COGNITIVE LEVELS
C402-31.1	Outline the changes that influence the financial sector in digital age	Understand (Level 2)
C402-31.2	Evaluate the key differences between traditional business management and technology management and the impact it has on business models	Evaluating (Level 5)
C402-31.3	Analyze the new developments in Financial Technology in banking sector.	Analyzing (Level 4)
C402-31.4	Analyze Consumer Behaviors & digital disruptions in Insurance	Analyzing (Level 4)
C402-31.5	Evaluate the limits, risks and broader policy and social implications of digital technology.	Evaluating (Level 5)
C402-31.6	Organising for Digital Innovation and Apply the knowledge of income tax by digital filing of income tax.	Applying (Level3)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Introduction	Financial services, Digitization, Digitalization, Digital Transformation, digital tools in finance, importance and risks. CASE STUDY OF BNP Paribus	04
2.	Digital Payment System	Electronic commerce, Advantages & Disadvantages of e commerce, Categories of e commerce, E payment systems, Electronic wallets, Smart Cards, credit cards, debit cards, Advantages and Disadvantages	04
3.	Digitization in Banking	Banking: its types, evolution of e banking ,otp, payment mechanisms, RTGS,NEFT, AEPS, UPI, POS, Digital wallets.	06
4.	Business Models for Digital Financial Services	Revenue stream Distribution strategy Partnership strategy technology Implementation	05
5.	Consumer Behaviors in Digital Economy	Analysis of behavior of financial service user, financial service provider, Principles of behavioral finance,	05

6.	Digital Disruptions in Insurance	Digital Changes in Life Insurance, Health & Other Insurance	06
7.	Digital Financial Services Risk and its Management	Strategic Risk, Regulatory, Operational Risk, Technology, Financial , Political Risk, Fraud risk, Agent Management Risk, Reputational Risk, Partnership Risk, Risk Management	08
8.	Digital/E-Income Tax Filing	Income tax filing, Issues related and suggestions & Organising for digital Innovation	04

2.	OECD (2018), Financial Markets, Insurance and Private Pensions: Digitalisation and Finance
3.	Digital Financial Services and Risk Management, International Financial Corporation, World Bank, Africa, 2019. Accessed on 2019(Online).Available: https://www.ifc.org/wps/wcm/connect/region__ext_content/ifc_external_corporate_site/sub-saharan+africa/resources/handbook-dfs-rm

Detailed Syllabus
Lecture-wise Breakup

Course Code	19B1NHS812	Semester- Even	Semester 8th Session 2018 -2019 Month from January 2019 to June 2019
Course Name	International Finance		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Dr. Mukta Mani
	Teacher(s) (Alphabetically)	Dr. Mukta Mani

COURSE OUTCOMES		COGNITIVE LEVELS
C402-12.1	Explain the global market scenario, its imperfections and risks which affect the multinational businesses trade.	Understanding level (C2)
C402-12.2	Analyze the international transactions of balance of payments and understand their relationship with key macroeconomic indicators	Analyzing level (C4)
C402-12.3	Apply the concepts of foreign exchange market and currency derivatives for making transactions in foreign exchange market	Applying level (C3)
C402-12.4	Analyze the role of parity conditions and other factors in exchange rate determination.	Analyzing level (C4)
C402-12.5	Analyze the central bank's intervention in foreign exchange market and evaluate the causes of exchange rate disequilibrium	Evaluating level (C5)

Module No.	Subtitle of the Module	Topics in the module	No. of Lectures for the module
1.	Introduction	Financial Globalization and Risk, Global financial Marketplace, Eurocurrency market and LIBOR, Theory of comparative advantage, Globalization process	4
2.	Balance of Payments	BOP transactions, accounting, Accounts of BOP, Capital and Financial Accounts, BOP and key macroeconomic variables	4
3.	Exchange Rates	Foreign Exchange market, functions, participants, types of transactions: spot, forward and swap transactions Methods of stating exchange rates, quotations and changes in exchange rates	6
4.	Foreign Exchange rate determination and forecasting	Exchange rate determination theories, Currency market intervention, disequilibrium, forecasting	6
5.	Forward Exchange	Forward foreign exchange, premiums and discounts, forward rates vs future spot rates, payoff profile, swaps, forward quotations	6

6.	Currency Futures and options market	Foreign currency futures, Currency options, Forwards, futures and options compared	6
7.	International Parity Conditions	Purchasing Power Parity and Interest Parity Prices and Exchange rates, Exchange rate pass-through, Forward rate, Prices, Interest rates and exchange rates in equilibrium	5
8.	Transaction and Translation Exposure	Types of foreign exchange exposure, Hedging, Overview of translation, Translation methods, US translation procedures	5
Total			42

2.	Levi, M.D., <i>International Finance</i> , 4 th Ed., Routledge Publication, 2009.
3.	Jain, P K., Peyrard, J. and Yadav, S.S., <i>International Financial Management</i> , Macmillan India, 1999.
4.	Desai, M.A., <i>International Finance- A Casebook</i> , Wiley India, 2007.
5.	Shapiro, Alan C., <i>Multinational Financial Management</i> , 7 th Ed., John Wiley and Sons Inc., 2003.

Detailed Syllabus
Lecture-wise Breakup

Course Code	18B12HS815	Semester Even	Semester 8th Session 2018 -2019 Month from January 2019 to May 2019
Course Name	QUALITY ISSUES IN ENGINEERING		
Credits	3	Contact Hours	3-0-0

Faculty (Names)	Coordinator(s)	Dr. Santoshi Sengupta
	Teacher(s) (Alphabetically)	Dr. Santoshi Sengupta

COURSE OUTCOMES		COGNITIVE LEVELS
C402-32.1	Apply the concepts of quality within quality management systems by understanding various perspectives, historical evolution; and contributions of key gurus in the field of quality	Apply Level (C3)
C402-32.2	Determine the effectiveness of acceptance sampling using single and double sampling plans and operating characteristic curves	Evaluate Level (C5)
C402-32.3	Determine quality by employing a wide range of basic quality tools, lean concepts and process improvement techniques such quality function deployment	Evaluate Level (C5)
C402-32.4	Examine the importance of six sigma, various quality standards, awards, certifications	Analyze Level (C4)

Module No.	Title of the Module	Topics in the Module	No. of Lectures for the module
1.	Fundamentals of Quality	Perspectives and Definitions of Quality, Dimensions Of Quality for Product and Service, History of Quality, Phases of Quality Assurance, Alignment, Linkage, Reengineering, Contribution of Gurus – Shewhart, Deming, Ishikawa, Juran	6
2.	Cost of Quality and Quality Function Deployment	Cost of Quality, Voice Of Customers: Kano's Model, House Of Quality, QFD Process	6
3.	Basic Tools of Quality	Checksheets, Cause and Effect Diagrams, Histograms, Flowcharts, Pareto Analysis, Scatter Diagrams, Run Charts	9
4.	Statistical Thinking And Applications	Acceptance Sampling, Single Sampling Plan, Double Sampling Plan, Statistical Process Control, Specification And Control Limits, Control Charts For Attributes, Control Charts For Variables	9
5.	Six Sigma, Benchmarking and Lean Concepts	Six Sigma, Capability Of A Process/Product/Service, DMAIC Process, Benchmarking Meaning, Process, Methods; JIT, Andon, Kanban, Kaizen, Poka-Yoke, 5-S, 7	9

		Mudas	
6.	Quality Standards and Awards	ISO Standards, MBNQA, RGNQA, Deming Prize	3
Total number of Lectures			42

Evaluation Criteria
