Rationale of the Workshop

Qualitative Research provides an organized, systematic, efficient and in-depth evaluation of a research question that will not be proficiently handled through quantitative research. It provides some real insight to thoughtful research practitioners to explore finer nuances of qualitative techniques to enable them to become more sensitive researchers. It also allows them to gain deep understanding of various research topics using different methods of qualitative research such as direct observation, in-depth interviews and focus groups.

Workshop Objectives

The objectives of this workshop are:

1. To provide an overview of qualitative research design and its various steps in planning studies using qualitative methods
2. To learn various qualitative tools and understand their application for different types of research questions
3. To provide hands-on training in the applications of Atlas.ti/NVivo software
