Emerging Trends and Technologies in Libraries and Information Services

About The Book

The emerging technologies have gripped the entire society under its impact domain. The industrial and service sectors are witnessing multiple changes in operation management. The Knowledge Resource Centres are also being affected by these technologies. The storage, retrieval and library management technologies have solved century old problems. The open access and open source have become the testing time for librarians. In this book, the contributors have made an effort to touch all possible areas of emerging trends and technologies in libraries and information services. The book is the outcome of the International Symposium on Emerging Trends and Technologies in Libraries and Information Services held at Jaypee Institute of Information Technology University, Noida (UP), India during from 18-20 December* 2008.
