

**New courses for third semester of Bachelor of Science (B. Sc.) in Computer Science programme for students of 2022-26 batch**

**Operating System (23B21MA211)**

Introduction to System Programs & Operating Systems, Evolution of Operating System. Concept, Process Control Blocks (PCB), Scheduling criteria Pre-emptive & non Pre-emptive process scheduling, Scheduling algorithms. Memory Hierarchy, Concepts of memory management. File Management and Distributed operating system and Security Concept.

**Course Description**

|   |   |   |   |
|---|---|---|---|
| <b>Course Code</b>  | <b>23B21MA211</b>   | <b>Semester Odd</b>   | <b>Semester III Session 2022-23<br/>Month from Jul 2023 to Dec 2023</b> |
| <b>Course Name</b>  | <b>OPERATING SYSTEM</b>   |   |   |
| <b>Credits</b>  | <b>3</b>  | <b>Contact Hours</b>  | <b>3-0-0</b>  |
| <b>Faculty (Names)</b>  | <b>Coordinator(s)</b>   |   |   |
|   | <b>Teacher(s)<br/>(Alphabetically)</b>  |   |   |
| <b>COURSE OUTCOMES:</b> After the successful completion of this course, the student will be able to |   |   | <b>COGNITIVE LEVELS</b>   |
| <b>CO1</b>  | describe and explain the fundamental components of operating systems and system programming.        |   | Understand Level (C2)   |
| <b>CO2</b>  | apply and compare various policies of scheduling in processes and threads in OS.                    |   | Apply Level (C3)  |
| <b>CO3</b>  | explain various resource management techniques of operating systems and compare their performances. |   | Understand Level (C2)   |
| <b>CO4</b>  | understand the concept of IPC and apply various process synchronization techniques in OS.           |   | Apply Level (C3)  |
| <b>CO5</b>  | discuss the working of IO management and apply various disk scheduling techniques.                  |   | Apply Level (C3)  |
| <b>CO6</b>  | analyze and report appropriate OS design choices for building real-world systems.                   |   | Analyze Level (C4)  |
| <b>Module No.</b>   | <b>Title of the Module</b>  | <b>Topics in the Module</b>   | <b>No. of Lectures for the module</b>                                   |
| <b>1</b>  | <b>Introduction</b>   | Introduction to System Programs & Operating Systems, Evolution of Operating System (mainframe, desktop, multiprocessor, Distributed, Network Operating System, Clustered & Handheld System), Operating system services, Operating system structure, System Call & System Boots, Operating system design & Implementations, System protection, Buffering & Spooling. Types of Operating System: Bare machine, Batch Processing, Real-Time, Multitasking & Multiprogramming, time-sharing system. | 10  |

|  |  |   |    |
|--|--|---|----|
| 2  | <b>Process Management</b>                                | <p>Concept, Process Control Blocks (PCB), Scheduling criteria Pre-emptive &amp; non Pre-emptive process scheduling, Scheduling algorithms, algorithm evaluation, multiple-processor scheduling, real time scheduling, operations on processes, threads, inter-process communication, precedence graphs, critical section problem, semaphores, classical problems of synchronization.</p> <p>Deadlock: Characterization, Methods for deadlock handling, deadlock prevention, deadlock avoidance, deadlock detection, recovery from deadlock.</p> | 10 |
| 3  | <b>Memory Management</b>                                 | <p>Memory Hierarchy, Concepts of memory management, MFT &amp; MVT, logical and physical address space, swapping, contiguous and non-contiguous allocation, paging, segmentation, and paging combined with segmentation. Structure &amp; implementation of the Page table.</p> <p>Concepts of virtual memory, Cache Memory Organization, demand paging, page replacement algorithms, allocation of frames, thrashing, demand segmentation</p>  | 8  |
| 4  | <b>File Management</b>                                   | <p>concepts, access methods, free space management, allocation methods, directory systems, protection, organization, sharing &amp; implementation issues, Disk &amp; Drum Scheduling, I/O devices organization, I/O buffering, I/O Hardware, Kernel I/O subsystem, Transforming I/O request to hardware operations. Device Driver: Path managements, Submodule, Procedure, Scheduler, Handler, Interrupt Service Routine. File system in Linux &amp; Windows</p>  | 8  |
| 5  | <b>Distributed operating system and Security Concept</b> | <p>Types, Design issues, File system, Remote file access, RPC, RMI, Distributed Shared Memory (DSM), Basic Concept of Parallel Processing &amp; Concurrent Programming, Introduction to distributed operating systems, design goal of distributed OS.</p> <p>Security &amp; threats protection: Security violation through Parameter, Computer Worms &amp; Virus, Security Design Principle, Authentications, Protection Mechanisms. Case study of Unix, Linux &amp; Windows.</p>   | 6  |
| <b>Total number of Lectures</b>  |  |   | 42 |
| <b>Evaluation Criteria</b>   |  |   |    |
| <b>Components</b>  |  | <b>Maximum Marks</b>  |    |
| T1   |  | 20  |    |
| T2   |  | 20  |    |
| End Semester Examination   |  | 35  |    |
| TA   |  | 25 (Quiz, Assignments, Tutorials)   |    |
| <b>Total</b>   |  | <b>100</b>  |    |
| <p><b>Project based learning:</b> A group of 3 to 4 students will be formed. Each group will have a group leader to develop coordination among the group members. Each group will be assigned a problem related to Operating Systems e.g. Scheduling criteria Pre-emptive &amp; non Pre-emptive process scheduling, Scheduling algorithms. Memory Hierarchy, Concepts of memory management. File Management and Distributed operating system and Security Concept. The group leader of each group will submit a report</p> |  |   |    |

and then finally each member of the group will be evaluated through a viva voce.

**Recommended Reading material:** Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

### Operating System Lab (23B25MA211)

Introduction to Unix Systems and commands, Process Control Blocks (PCB), Scheduling criteria Pre-emptive & non Pre-emptive process scheduling, Scheduling algorithms. Pthreads, Synchronizations concepts, Memory Hierarchy, memory management Policies.

### Course Description

|  |   |               |   |
|--|---|---------------|---|
| Course Code  | 23B25MA211  | Semester Odd  | Semester III Session 2023-24<br>Month from Jul 2023 to Dec 2023 |
| Course Name  | Operating System Lab  |               |   |
| Credits  | 1   | Contact Hours | 0-0-2   |
| Faculty (Names)  | Coordinator(s)  |               |   |
|  | Teacher(s)<br>(Alphabetically)                                |               |   |
| COURSE OUTCOMES: After the successful completion of this course, the student will be able to |   |               | COGNITIVE LEVELS  |
| CO1  | infer various Unix Commands.                                  |               | Understand Level (C2)   |
| CO2  | develop programs to create different types of processes using |               | Apply Level (C3)  |

|   | pthread library under Linux environment.  |  |                                |
|---|---|--|--------------------------------|
| CO3   | develop programs to implement resource management task like CPU scheduling algorithms, deadlock handling.   |  | Apply Level (C3)               |
| CO4   | develop programs to implement and test various synchronization techniques like semaphores, binary semaphore and monitors via different classical test suites. |  | Apply Level (C3)               |
| CO5   | analyze different memory management policies  |  | Analyze Level (C4)             |
| Module No.  | Title of the Module   | Topics in the Module   | No. of Lectures for the module |
| 1.  | Unix  | Unix Commands-files,-access, open, close, append, read write, pipes, filter, system calls, directory commands, terminal commands, environment commands   | 3                              |
| 2.  | Process and Threads   | Process creation/ Inter process communication (IPC) – POSIX thread library, pthread join, threads with global variables, pthread condition variables, parent child processes, zombie process, orphan process | 3                              |
| 3.  | CPU Scheduling  | Resource management tasks like CPU scheduling algorithms, deadlock handling. - FCFS, Priority, Preemptive Priority, Round Robin, SJF, SRJF, MLFQ , Bankers algorithm,  | 3                              |
| 4.  | Synchronization   | Synchronization techniques like semaphores, binary semaphore and monitors via different classical test suites, readers writers problem, dining philosophers problem.   | 3                              |
| 5.  | Memory Management Policies  | Memory management policies implementation-Best Fit, First fit, Worst Fit page replacement algorithms   | 2                              |
| <b>Total number of Labs</b>   |   |  | <b>14</b>                      |
| <b>Evaluation Criteria</b>  |   |  |                                |
| <b>Components</b>   |   | <b>Maximum Marks</b>   |                                |
| Mid Viva  |   | 20   |                                |
| End Viva  |   | 20   |                                |
| TA  |   | 60   |                                |
| <b>Total</b>  |   | <b>100</b>   |                                |
| <b>Project based learning:</b> A group of 4 to 5 students will be formed. Each group will have a group leader to develop coordination among the group members. Each group will be assigned a problem related to Operating Systems Concepts e.g. Scheduling criteria Pre-emptive & non Pre-emptive process scheduling, Scheduling algorithms. Memory Hierarchy, Concepts of memory management. File Management and Distributed operating system and Security Concept. The group leader of each group will submit a report and then finally each member of the group will be evaluated through a viva voce. |   |  |                                |
| <b>Recommended Reading material:</b> Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)  |   |  |                                |

| <b>CO1</b>  | apply the fundamental elements of Web development in design of web pages using HTML (static web pages) |                      | Apply Level (C3)                       |
| <b>CO2</b>  | apply the fundamental elements of Web development in design of web pages using XML and CSS             |                      | Apply Level (C3)                       |
| <b>CO3</b>  | demonstrate the web development concepts built on Advanced Java Scripting (dynamic web pages)          |                      | Understand Level (C2)                  |

| CO4   | make use of functional aspects of database handling to create database using PHP | Apply Level (C3)  |                                |
|---|--|---|--------------------------------|
| CO5   | utilize MYSQL for database connectivity with Web pages                           | Apply Level (C3)  |                                |
| Module No.  | Title of the Module  | Topics in the Module  | No. of Lectures for the module |
| 1   | Review of Essential topics in Web Development                                    | Introduction to HTML Programming: The Basics (Head, Body, Colors, Attributes), Lists: ordered and unordered, Links: Introduction Relative Links, Absolute Links and Link Attributes, Images, Tables, Forms  | 8                              |
| 2   | Web development in design of web pages using XML and CSS                         | Introduction: Understanding Mark-up Languages, Introduction to XML and its Goals. XML Basics: XML Structure and Syntax, Document classes and Rules. Other XML Concepts: Scripting XML, XML as Data, Linking with XML. XML with Style: XSL –Style Sheet Basics, XSL basics, XSL style sheets.<br><br>Cascading style sheet (css) for text formatting and other manipulations.                                    | 8                              |
| 3   | Developing dynamic web pages using Java Script                                   | Data types and variables, functions, methods and events, controlling program flow, JavaScript object model, built-in objects and operators.   | 8                              |
| 4   | Databases and PHP  | PHP: Starting to script on server side, Arrays, function and forms, advance PHP.<br><br>Databases: Basic command with PHP examples, Connection to server, creating database, selecting a database, listing database, listing table names creating a table, inserting data, altering tables, queries, deleting database, deleting data and tables, PHP myadmin and database bugs, Database Connectivity with PHP | 10                             |
| 5   | Database Connectivity using MYSQL  | Database connectivity of forms with back end tool using MYSQL, populating the data in text boxes, list boxes etc. searching of data in database using forms. Updating/ editing of data based on a criterion.  | 8                              |
| <b>Total number of Lectures</b>   |  |   | <b>42</b>                      |
| <b>Evaluation Criteria</b>  |  |   |                                |
| <b>Components</b>   |  | <b>Maximum Marks</b>  |                                |
| T1  |  | 20  |                                |
| T2  |  | 20  |                                |
| End Semester Examination  |  | 35  |                                |
| TA  |  | 25 (Quiz, Assignments, Tutorials)   |                                |
| <b>Total</b>  |  | <b>100</b>  |                                |
| <b>Project based learning:</b> A group of 4-5 students will develop a web application using any of the web technologies (either single or in combination) covered as part of this course. Students will be required to develop a secure web application having countermeasures implemented against web hacks like XSS, CSRF, injection attacks, DOS attacks etc. Building a web application using advanced JS scripting and/ or web frameworks, while handling the various facets of cyber security will give students hands on experience of working in the area of web technology and cyber security. |  |   |                                |

The knowledge gained will enhance their employability in the IT sector.

### **Web Technology Lab (23B25MA212)**

Review of Essential topics in Web Development, Web development in design of web pages using XML and CSS, Developing dynamic web pages using Java Script, Databases and PHP, Database Connectivity using MYSQL.

### **Course Description**

|                     |                           |                      |   |
|---------------------|---------------------------|----------------------|---|
| <b>Subject Code</b> | <b>23B25MA212</b>         | <b>Semester Odd</b>  | <b>Semester III Session 2023-24</b><br><b>Month from Jul 2023 to Dec 2023</b> |
| <b>Subject Name</b> | <b>Web Technology Lab</b> |                      |   |
| <b>Credits</b>      | <b>1</b>                  | <b>Contact Hours</b> | <b>0-0-2</b>  |
| <b>Faculty</b>      | <b>Coordinator(s)</b>     |                      |   |

| (Names)   | Teacher(s)<br>(Alphabetically)   |   |             |
|---|--|---|-------------|
| <b>COURSE OUTCOMES:</b> After the successful completion of this course, the student will be able to |  | <b>COGNITIVE LEVELS</b>   |             |
| CO1   | apply the fundamental elements of Web development in design of web pages using HTML (static web pages) | Apply Level (C3)  |             |
| CO2   | apply the fundamental elements of Web development in design of web pages using XML and CSS             | Apply Level (C3)  |             |
| CO3   | demonstrate the web development concepts built on Advanced Java Scripting (dynamic web pages)          | Understand Level (C2)   |             |
| CO4   | make use of functional aspects of database handling to create database using PHP                       | Apply Level (C3)  |             |
| CO5   | utilize MYSQL for database connectivity with Web pages   | Apply Level (C3)  |             |
| Module No.  | Subtitle of the Module   | Topics in the module  | No. of Labs |
| 1.  | Review of Essential topics in Web Development  | Introduction to HTML Programming: The Basics (Head, Body, Colors, Attributes), Lists: ordered and unordered, Links: Introduction Relative Links, Absolute Links and Link Attributes, Images, Tables, Forms  | 3           |
| 2.  | Web development in design of web pages using XML and CSS   | Introduction: Understanding Mark-up Languages, Introduction to XML and its Goals. XML Basics: XML Structure and Syntax, Document classes and Rules. Other XML Concepts: Scripting XML, XML as Data, Linking with XML. XML with Style: XSL – Style Sheet Basics, XSL basics, XSL style sheets. Cascading style sheet (css) for text formatting and other manipulations.  | 3           |
| 3.  | Developing dynamic web pages using Java Script   | Data types and variables, functions, methods and events, controlling program flow, JavaScript object model, built-in objects and operators.   | 3           |
| 4.  | Databases and PHP  | PHP: Starting to script on server side, Arrays, function and forms, advance PHP.<br><br>Databases: Basic command with PHP examples, Connection to server, creating database, selecting a database, listing database, listing table names creating a table, inserting data, altering tables, queries, deleting database, deleting data and tables, PHP myadmin and database bugs, Database Connectivity with PHP | 2           |

|                             |                                   |  |           |
|-----------------------------|-----------------------------------|--|-----------|
| 5.                          | Database Connectivity using MYSQL | Database connectivity of forms with back end tool using MYSQL, populating the data in text boxes, list boxes etc. searching of data in database using forms. Updating/ editing of data based on a criterion. | 3         |
| <b>Total number of Labs</b> |                                   |  | <b>14</b> |

#### Evaluation Criteria

| Components   | Maximum Marks |
|--------------|---------------|
| Lab Viva-1   | 20            |
| Lab Viva-2   | 20            |
| Day to Day   | 60            |
| <b>Total</b> | <b>100</b>    |

**Project based learning:** A group of 4-5 students will develop a web application using any of the web technologies (either single or in combination) covered as part of this course. Students will be required to develop a secure web application having countermeasures implemented against web hacks like XSS, CSRF, injection attacks, DOS attacks etc. Building a web application using advanced JS scripting and/ or web frameworks, while handling the various facets of cyber security will give students hands on experience of working in the area of web technology and cyber security. The knowledge gained will enhance their employability in the IT sector.

**Recommended Reading material:** Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

## Probability and Statistics (15B11MA302)

Representation of data, measures of central tendency, dispersion, skewness and kurtosis, permutations and combinations, axioms of probability, conditional probability, multiplication and addition theorems, Baye's theorem, random variable, discrete and continuous distributions, Binomial, Uniform, Normal and Poisson distributions, elementary sampling theory, test of hypothesis and significance, curve fitting by the method of least squares, correlation and regression.

### Course Description

|  |   |   |   |
|--|---|---|---|
| <b>Course Code</b>   | <b>15B11MA302</b>   | <b>Semester Odd</b>   | <b>Semester III Session 2023-24<br/>Month from Jul 2023 to Dec 2023</b> |
| <b>Course Name</b>   | <b>Probability and Statistics</b>   |   |   |
| <b>Credits</b>   | <b>4</b>  | <b>Contact Hours</b>  | <b>3-1-0</b>  |
| <b>Faculty (Names)</b>   | <b>Coordinator(s)</b>   |   |   |
|  | <b>Teacher(s)<br/>(Alphabetically)</b>  |   |   |
| <b>COURSE OUTCOMES</b>   |   |   | <b>COGNITIVE LEVELS</b>   |
| After pursuing the above mentioned course, the students will be able to: |   |   |   |
| <b>C202.1</b>  | demonstrate different diagrammatic representation of data and explain the measures of central tendency, dispersion and asymmetry. | Understand Level (C2)   |   |
| <b>C202.2</b>  | explain the concepts of probability theory and Bayes' theorem.  | Understanding Level (C2)  |   |
| <b>C202.3</b>  | explain and solve the problems of probability distributions along with their mean, variance & moment generating functions.        | Apply Level (C3)  |   |
| <b>C202.4</b>  | explain sampling theory and apply test of hypothesis on small and large samples.  | Apply Level (C3)  |   |
| <b>C202.5</b>  | apply the method of least squares for curve fitting and explain correlation and regression.                                       | Apply Level (C3)  |   |
| <b>Module No.</b>  | <b>Title of the Module</b>  | <b>Topics in the Module</b>   | <b>No. of Lectures for the module</b>                                   |
| 1.   | Classification of Data  | Classification of data, graphic and diagrammatic representation of data, measures of central tendency and dispersion i.e. mean and standard deviation, measures of skewness and kurtosis.                                       | 6   |
| 2.   | Probability   | Sample space and events, Permutations and combinations, Probability of an event, Axioms of probability, Equiprobable spaces, Conditional probability, Multiplication and addition theorems, Bayes' theorem, independent events. | 10  |
| 3.   | Random Variables  | Random Variable, Discrete and continuous distributions, Mean and variance of a random variable  | 4   |
| 4.   | Probability Distributions   | Binomial, Uniform, Normal and Poisson distributions.  | 8   |
| 5.   | Sampling Theory   | Test of hypothesis and significance. Test based on Exact (Small) Sampling- Chi-square test, t test and F test.  | 10  |

|   |   |   |           |
|---|---|---|-----------|
| 6.  | <b>Correlation and Regression</b>   | Curve fitting by the method of least squares, Correlation and regression. | 4         |
| <b>Total number of Lectures</b>   |   |   | <b>42</b> |
| <b>Evaluation Criteria</b>  |   |   |           |
| <b>Components</b>   |   | <b>Maximum Marks</b>  |           |
| T1  |   | 20  |           |
| T2  |   | 20  |           |
| End Semester Examination  |   | 35  |           |
| TA  |   | 25 (Quiz, Assignments, Tutorials, PBL)                                    |           |
| <b>Total</b>  |   | <b>100</b>  |           |
| <b>Project Based Learning:</b> Each student in a group of 7-8 students will apply the concepts of sampling theory, correlation and regression to solve some real life problems.         |   |   |           |

**Project based learning:** Project is an integral part of the lab. Students form a group (of size 3), and discuss their project ideas with their faculty before finalizing their research areas. The project is done using object-oriented programming language and develops applications ranging from basic to advanced problem statements. This helps students in understanding the working of project development in companies and also broadens the spectrum for team work and procedural implementation of projects in hand to be delivered to clients as per the requirements.

**Recommended Reading material:** Author(s), Title, Edition, Publisher, Year of Publication etc. (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format)

#### **Competitive Programming Workshop (23B51CS212)**

CP1 teaches several commonly encountered techniques to solve programming interview and competitive programming questions, including usage of data structures such as set, map, stack, queue, deque, priority queue, prefix sum arrays, two pointers, sliding window, depth-first search, breadth-first search, binary search, meet-in-the-middle, etc. These platforms offer challenges and competitions for various programming languages such as C, C++, and more. Additionally, they also offer tutorials, video lectures, and other resources to help you improve your skills.

### Course Description

|  |  |  |   |
|--|--|--|---|
| <b>Course Code</b>   | <b>23B51CS212</b>  | <b>Semester Odd</b>  | <b>Semester III Session 2023-24<br/>Month from Jul 2023 to Dec<br/>2023</b> |
| <b>Course Name</b>   | <b>Competitive Programming Workshop</b>  |  |   |
| <b>Credits</b>   | <b>2</b>   | <b>Contact Hours</b>   | <b>1-0-2</b>  |
| <b>Faculty<br/>(Names)</b>   | <b>Coordinator(s)</b>  |  |   |
|  | <b>Teacher(s)<br/>(Alphabetically)</b>   |  |   |
| <b>COURSE OUTCOMES:</b> After the successful completion of this course, the student will be able to  |  |  | <b>COGNITIVE LEVELS</b>   |
| <b>CO1</b>   | demonstrate the working of various online competitive platforms                            |  | Understand Level (C2)   |
| <b>CO2</b>   | explain various data structures and algorithm design techniques with the help of examples. |  | Understand Level (C2)   |
| <b>CO3</b>   | apply and build various algorithms and design techniques to solve the given problem.       |  | Apply Level (C3)  |
| <b>CO4</b>   | examine the algorithm by their complexity using asymptotic notation.                       |  | Analyze Level (C4)  |
| <b>CO5</b>   | examine the correctness and complexity of the algorithm for a given problem.               |  | Analyze Level (C4)  |
| <b>Module No.</b>  | <b>Title of the Module</b>   | <b>Topics in the Module</b>  | <b>No. of Labs</b>  |
| 1.   | Competitive Platforms  | Develop Code on Various Competitive Platform<br>Leetcode, Codechef, codeforces, geeksforgeek,<br>CodeChef,HackerRank,TopCoder,AtCoder,<br>HackerEarth, etc | 1   |
| 2.   | Data Structures  | Arrays, Linked Lists, Stacks, Queues,  | 4   |
| 3.   | Algorithms   | Sorting, Searching, Greedy Algorithms, Backtracking,<br>Divide and Conquer, etc.   | 4   |
| 4.   | Programming Concepts   | Recursion, Pointers, Dynamic Memory Allocation, Bit<br>Manipulation, etc.  | 3   |
| 5  | Problem-Solving Techniques   | Problem analysis, Test case generation, Debugging, etc.  | 2   |
| <b>Total number of Labs</b>  |  |  | <b>14</b>   |
| <b>Evaluation Criteria</b>   |  |  |   |
| <b>Components</b>  |  | <b>Maximum Marks</b>   |   |
| Mid  |  | 30   |   |
| End  |  | 40   |   |
| Day-to-Day   |  | 30 (Quiz, Assignment, Test, Attendance)  |   |
| <b>Total</b>   |  | <b>100</b>   |   |
| <b>Project based learning:</b> A group of 3-4 students will be formed. Each group will have a group leader to develop coordination among the group members. Each group will be assigned a problem related real life applications of algorithms. The group leader of each group will submit a report and then finally each member of the group will be evaluated through a viva voce. |  |  |   |
| <b>Recommended Reading material:</b> Author(s), Title, Edition, Publisher, Year of Publication etc.  |  |  |   |

| (Text books, Reference Books, Journals, Reports, Websites etc. in the IEEE format) |   |
|--|---|
| 1.   | T. H. Cormen, C. E. Leiserson, R. L. Rivest, and C. Stein, Introduction to Algorithms, MIT Press, 4th Edition, 2022.      |
| 2.   | S. Skiena, The Algorithm Design Manual, Springer; 2nd Edition, 2020.  |
| 3.   | D. E. Knuth, The art of Computer Programming Volume 4A, Pearson Publication 2014.   |
| 4.   | E. Horowitz, S. Sahni, Fundamentals of Computer Algorithms, Computer Science Press, 2008                                  |
| 5.   | R. Sedgewick, Algorithms in C, 3rd edition. Addison Wesley, 2002.   |
| 6.   | A. V. Aho, J.E. Hopcroft, and Jeffrey D. Ullman, Data Structures and Algorithms, Addison-Wesley Publishing Company, 1983. |

**CO-PO-PSO Mapping:**

| CO         | PO1      | PO2      | PO3      | PO4      | PO5      | PO6 | PO7      | PO8      | PO9      | PSO-CS   | PSO-IT   | PSO-CP   |
|------------|----------|----------|----------|----------|----------|-----|----------|----------|----------|----------|----------|----------|
| CO1        | 2        | 2        | 2        | 3        | 1        |     | 1        | 1        | 2        | 3        | 3        | 3        |
| CO2        | 2        | 2        | 2        | 2        | 1        |     | 1        | 1        | 2        | 3        | 3        | 3        |
| CO3        | 2        | 2        | 3        | 2        | 1        |     | 3        | 1        | 2        | 3        | 3        | 3        |
